NATIONAL PHOTOGRAPHIC INTERPRETATION CENTER		PHOTO INTERPRETATION BRIEF	
Title: Borodyanka Airfield, USSR	Geo Coords: 50-40N 29-56E	COMOR No: None	Publication No: NPIC/R-120/63
	NPIC Target No: 0233-126		Date: July 1963

25X1A

References: USATC Series 200, Sheet 0233-8HL, May 62 (S)
NPIC Project J-164/63

The airfield, 25 nm NW of Kiyev and one nm north of Borodyanka, consists of a graded earth runway 10,650 feet long and 285 feet wide; only 9,000 feet of the SE end of the runway appear to be in use. The runway is oriented in a WNW/ESE direction and is serviceable. The possibility that pierced steel planking is being employed on the runway cannot be determined because of the small scale of the photography.

Two support areas are identified. One of these, to the south of the runway, contains several

buildings including probable minor support and operations facilities. The other area near the west end of the runway is possibly a POL storage area. The airfield is road served.

Jet blast marks along the parking area and trails leading from the support area south of the runway to various points along the parking area indicate that the airfield has been active for some time prior to the present coverage.

Twenty-five BADGER aircraft were present at the time the photography was obtained.
